INTRODUCTION

Front-End Developer experienced in building modern, responsive web and mobile applications using React, Next.js, TypeScript, and React Native. Skilled in creating clean, intuitive user interfaces with a focus on responsive design, usability, and performance. Experienced in taking projects from development through testing and production release. Passionate about building seamless, user-friendly applications with clean and efficient code.

SKILLS

Web: NextJS, React.js, TypeScript/JavaScript, Tailwind CSS, React Redux

Mobile: React Native, Expo, Nativewind CSS, Google Play Store publishing (builds, release management)

Tools: Git/Github, VS code, EAS

PROFESSIONAL EXPERIENCE

Freelance - Remote

May. 2025 - Present

Frontend Mobile & Web Developer

- Built and shipped production-ready web and mobile applications using React, Next.js, React Native, TypeScript, and Expo
 - Developed responsive, intuitive user interfaces with a focus on performance, usability, and clean component architecture
 - Worked directly with clients to understand requirements, implement features, and deliver complete solutions from development to release
 - Published and maintained mobile applications on the Google Play Store, handling testing, builds, and release management
-

PROJECTS

Flash - smart flashcards

[GooglePlay](#) · [Github](#)

- Published a flashcard learning app to Google Play with AI-assisted generation, category management, bookmarks, offline support, and a reel-style navigation UX.
- Managed the full release pipeline via Google Play Console including versioning, testing tracks, and production rollouts.

LifeOS — Habits & Streak Tracker

[GooglePlay](#) · [Github](#)

- Designed and shipped a habit and streak tracking app with daily progress visualisation and streak preservation, optimised for Android performance.
-

EDUCATION

Bachelor in Software Engineering (BSSE)

Virtual University of Pakistan

2026 - 2030
